Produkto — Co-founder equity agreement

Between Kelian Mayco van Tulder and Gabriele Federico Surijon ("Gabe")

Date: 5 October 2026

Path A: full-time in June 2027 → 35% in total

How it works:

- He signs for 10% of the company now. It's his from day one.
- When he goes full-time (by July 2027), he gets another 25%, which brings him to 35%.
- The 35% is earned over 3 years, counted from his start in November 2026, so his part-time months count.
- If he leaves, he only keeps what he's earned so far. The company buys back the rest at the price he originally paid.
- If he isn't full-time by July 2027, Path B or Path C applies instead.

If he leaves, he keeps:

- In the first year (before Nov 2027): 0%.
- Nov 2027: about 11.7%.
- Nov 2028: about 23.3%.
- From Nov 2029: the full 35%.

Conditions:

- Until June 2027: a minimum of 20 hours a week.
- After June 2027: full-time means Produkto is his main job. No master's or other job alongside.

Path B: master's first, full-time after → 20% in total

How it works:

- He signs for 10% of the company now. It's his from day one.
- When he goes full-time after his master's (by June 2029), he gets another 10%, which brings him to 20%.
- Part-time work earns him 4%: half after 1 year, all of it after 2 years.
- The rest (16%) is earned over 4 years from the day he goes full-time, with more in the later years (10%, 20%, 30% and 40% of it per year).
- If he leaves, he only keeps what he's earned so far. The company buys back the rest at the price he originally paid.

If he leaves, he keeps (assuming full-time in July 2028):

- In the first year (before Nov 2027): 0%.
- Nov 2027: 2%.
- Nov 2028: 4%.
- July 2029: about 5.6%.
- July 2030: about 8.8%.
- July 2031: about 13.6%.
- From July 2032: the full 20%.

Conditions:

- During uni and the master's: a minimum of 20 hours a week.
- After the master's: Produkto is his main job.

Path C: never goes full-time → reduced to 4%

How it works:

- He signs for 10% of the company now. It's his from day one.
- If he hasn't gone full-time by June 2029, his stake is reduced to 4%. He sells the other 6% back at the price he originally paid.
- Part-time work earns him that 4%: half after 1 year, all of it after 2 years.

If he leaves, he keeps:

- In the first year (before Nov 2027): 0%.
- Nov 2027: 2%.
- From Nov 2028: 4%, which is the most he can keep without going full-time.

Conditions:

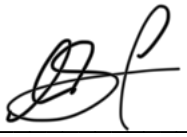

- While part-time: a minimum of 20 hours a week.
- If the hours stop, he stops earning. He keeps what he's earned so far.

Also agreed

- Everything Gabe builds or brings in for Produkto belongs to Produkto.
- Shares that have to be sold back are sold at the price he originally paid, and he agrees to sell them.
- Both agree to turn this letter into a formal agreement once Produkto is set up as a company.
